

Elephant Experience

Khao Sok

Meet and engage with traditional mahouts, listen to stories about their communities and their skills handed down through generations.

Appreciate these incredible intelligent animals and learn about their habitat and diet - each elephant requires almost 200 kgs of food per day! Help your mahout as they feed these gentle giants their favorite snacks, and watch as they are bathed and play in the river. Observe them stroll back through the palm tree plantations to their grassy paddock for another fresh fruit treat.

Khiri Travel supports only projects that encourage animal welfare and discourage activities that exploit animals.
